OVER **FIVE DECADES** OF FARM MACHINERY

FOUNDED IN 1972, SHELBOURNE REYNOLDS HAS BEEN A FIXTURE IN AGRICULTURAL EQUIPMENT MANUFACTURING EVER SINCE.

Today, we are located on the same site in Stanton, near Bury St Edmunds, Suffolk, where we were established – but our business continues to grow. Our factory now covers over 12,000 sq m of the two hectare premises on which we are based, and employs 170 people.

Here, we use the latest design software to create the machines our markets demand, and utilise some of the most sophisticated manufacturing equipment available to produce not only Powermix diet feeders, but also Shelbourne hedge/verge trimmers, Powerspread manure spreaders and a host of other arable, livestock and groundcare machinery.

Our manufacturing technology includes CNC machining centres, laser steel cutting machines and one of the UK's largest powder coat paint facilities. All of this means we are able to create in-house, to extremely high standards, a large proportion of the components required for our equipment, using processes including machining and gear cutting to manufacture specific drives for specific applications.

With Shelbourne Reynolds equipment, there's no question of compromising machine performance or longevity by using lower spec cheaper components. That means our dealers and customers benefit from knowing that we put our name to every key component of our equipment.

A PROVEN HISTORY IN FEEDER PRODUCTION

EXPERIENCE IS AN ESSENTIAL ELEMENT OF RELIABLE DESIGN, AND WITH A HISTORY OF DIET FEEDER PRODUCTION STRETCHING BACK MORE THAN 25 YEARS, YOU CAN BE SURE SHELBOURNE REYNOLDS HAS JUST THAT.

Our first Powermix models were introduced in 1996. Since then, our focus has always been on the bale processing capabilities, positive mixing action and low horsepower requirements of auger-based machines.

But as farms have expanded and herd sizes have grown, our engineers have kept pace by designing new, higher capacity models with faster mixing and feed-out times. Today, the Powermix range spans models with capacities from 9-46 cubic metres, with augers and feed-out systems built to match specific capacity sectors.

Read on to find out how the characteristics we design into our feeders can help you to get more from your feed, no matter what the size of your enterprise.

AUGER DESIGN

STANDARD STEPPED AUGER

- Fitted to all Powermix Pro models

HEAVY DUTY STEPPED AUGER

Fitted to Powemix Plus models

- 15mm S500 auger flight
- 15mm stainless steel edging
- Replaceable wear pads

FEED-OUT OPTIONS

POWERMIX PRO & PLUS COMPACT - HYDRAULIC SIDE DOOR

- Suited to on-floor or shallow trough systems

POWERMIX PRO EXPRESS FIXED FRONT CONVEYOR

- Variable-speed conveyor belt suited to feeding to the left or right

POWERMIX PRO EXPRESS / PLUS ELEVATING FRONT CONVEYOR

- Variable speed conveyor belt for feeding to the left or right into raised troughs

POWERMIX PRO SIDE DOOR

9, 11, 13 & 15m³ Single Auger - Side Discharge

BIG IN FEATURES.

Our entry-level line, the Powermix Pro Side Door, comprises of four models and features a simple hydraulic right front corner feed out door suitable for floor feeding or low level troughs. An optional rear left corner door is available to feed out on both sides.

POWERMIX PRO EXPRESS

9, 11, 13 & 15m³ - Single Auger

FIXED OR ELEVATING FRONT CONVEYOR.

Like the Powermix Pro Side Door, the single-auger Powermix Pro Express range features a tall auger for quick, efficient mixing and three feed legs for fast, even feed-out.

Choose from 9-15m³ capacity models. The front-mounted Express conveyor is available as a fixed unit for feed delivery to either side, or an elevating conveyor for dispensing into raised troughs to both sides.

POWERMIX PLUS - SIDE DOOR

16, 18, 20 & 22m³ Compact - Twin Auger

SIDE DOOR

The side door Powermix Plus range offers an entry level twin auger feeder with the simplicity of feeding onto the floor or into low level troughs. The left and right hand front side hydraulic doors are operated via the tractor spoil valves.

Designed around a shortened chassis with Shelbourne's distinctive curved tub to speed up bale processing and mixing, the 16 – 22m³ Powermix Plus Side Door models are engineered to meet the needs of those seeking high capacity in a manoeuvrable, compact package.

POWERMIX PLUS - WIDE BODY

22, 24, 28 & 30m³ Wide Body - Twin Auger

FOR THE MOST DEMANDING USERS.

With a short chassis for manoeuvrability and a curved tub shape for more efficient bale processing and faster mixing times, the Powermix Plus Wide Body is the flagship of the Shelbourne Reynolds range, designed for the largest herds and most demanding users. The high capacity yet compact twin auger line now includes four flagship models, aimed at users feeding 100t or more per day.

POWERMIX BIO STATIC

9-46m³ Single Or Twin Auger

DESIGNED WITH THE KNOWLEDGE GAINED FROM OVER TWENTY YEARS OF MANUFACTURING MACHINES FOR THE LIVESTOCK MARKET.

The Powermix Bio range of static mixers has been developed in conjunction with several UK biogas installation companies to meet the specific needs of anaerobic digester operators.

As a result, they are built for longevity, serviceability, mix quality and discharge consistency.

KEY FEATURES

ELECTRONIC SCALE SYSTEMS

A choice of scale systems is available, offering compatibility with existing control systems.

BOLT-IN STAINLESS STEEL TUB LINER

A bolt-in stainless steel liner is fitted to the floor and lower 1.5m tub wall. The floor section is 10mm thick and the sidewalls 8mm. This prevents corrosion and minimises wear as well as creating a clean smooth surface for minimal power requirement. The tub base is treated with a zinc paint to prevent internal rusting. The liner can be replaced in individual sections with minimal down time and no welding required.

STAINLESS STEEL AUGERS

The augers are made from 15mm stainless steel with a further 10mm stainless steel wear strip welded to the outer flight. They feature three feed-out legs which help deliver material evenly to the tub discharge point.

ADJUSTABLE STANDS

The twin auger chassis consists of eight adjustable legs connected to the tub via load cells for easy installation and accurate weighing.

FULLY-MOUNTED INTEGRATED ELECTRIC MOTORS AND PLANETARY GEARBOXES

Electric motors and planetary gearboxes are sourced according to the machine size and mounted as a unit to the underside of the tub to facilitate a simple installation.

POWERMIX TYRE OPTIONS Specification

MODEL	TYRE	HEIGHT	WIDTH
9-15 m SINGLE AUG.	400/45 R17.5	800 mm	400 mm
9-15 m SINGLE AUG.	385/55 R19.5	930 mm	385 mm
	385/65 R22.5	1080 mm	385 mm

	18R22.5	1160 mm	455 mm
	275/75R17.5Duals	780 mm	500 mm
16-22 m TWIN AUGER/TANDEM AXLE	385/55 R19.5	930 mm	385 mm
	385/55 R22.5	996 mm	386 mm
	385/65 R22.5	1080 mm	385 mm
WIDE BODY 22-30 m	435/50 R19.5	928 mm	446 mm

400/45 R17.5

For use on single auger machines to reduce height

385/55 R19.5

Standard tyre on all single auger models. Optional on tandem axle (16m-22m)

385/55 R22.5

Standard tyre on all tandem axle machines (16m-22m)

385/65 R22.5 SUPER SINGLE

Optional on all single auger and twin auger tandem axle machines when additional discharge height is required. Axle spacers required

POWERMIX TYRE OPTIONS Specification

445/50 R19.5

Standard on twin auger single axle and all Wide Body tandem axle machines and optional on all other twin auger tandem axle machines

275/75 R17.5 (DUALS)

Optional on single axle twin auger Plus machines (16-20m) when a lower machine height is required

STEERING AXLE

Standard on Powermix Plus Wide Body

Optional on Powermix Plus Compact Tandem Axle (16m-22m)

POWERMIX OPTIONS

Scale & Hydraulic Controls

PROGRAMMABLE SCALE OPTIONS

DIMAMICA GENERALE DG600

- Basic scale to weigh up & down
- Programmable rations within scale head
- Record feed volumes
- Optional subscription for further feed data management USB stick or wireless data transfer

WIRELESS REMOTE SCALE HEAD

- Mount in tractor or telehandler cab

DIGI-STAR EZ 3410 BT

- Basic scale to weigh up & down
- Free Bluetooth app for display & control
- Programmable rations within scale and phone app
- Optional subscription for further data management

WIRELESS ELECTRIC HYDRAULIC AND TWO-SPEED CONTROL (PLUS ONLY)

- Rugged ergonomic design giving precise, accurate control of all hydraulic functions including belt speed and two-speed operation
- Powered by AA batteries / requires single spool

WIRED ELECTRIC HYDRAULIC CONTROLS

- Gives precise, convenient control of three hydraulic functions using a single spool valve
- Variable belt speed control with turn dial

ELECTRIC TWO-SPEED CONTROL

- Allows electric two-speed gear change on direct coupled machines

POWERMIX

AUGER SPEEDS

Specification

MODEL	2 SPEED	540 PTO INPUT	1000 PTO INPUT
SINGLE AUGER (SINGLE SPEED)	N/A	28 rpm	52 rpm
